econ solutions grows and moves to a new location

econ solutions opened a new location in Mannheim on 1 August. This means that the specialist for operational energy management now has five branches across Germany, with its headquarters in Munich.

A professional and effective energy management is becoming increasingly important for companies, whether to meet legal requirements or the demands of customers and end consumers, to counteract high energy costs or to achieve self-imposed energy efficiency or climate protection goals. Accordingly, econ solutions continues to record strong growth in new customers and employees.

Therefore, econ solutions has now opened its fifth location in Mannheim to ensure proximity to its customers and facilitate and promote close cooperation with its parent company MVV Energie AG and sister companies, particularly the BFE Institute for Energy and Environment. The partner companies pool their expertise from all areas of energy and energy efficiency to comprehensively support companies in the energy transition.

"We are proud that econ solutions has established itself as one of the leading providers of operational energy management in Germany," says Mike Mannherz, Managing Director of econ solutions. "In order to continue growing and offer our customers first-class solutions and services in the future, we are constantly looking for people who want to help us shape the energy sector sustainably. With the city of Mannheim, we can now offer them another attractive opportunity to work with econ solutions."

econ solutions is headquartered in Munich and is also represented in Berlin, Meiningen, Mannheim, and Freiburg.

About econ solutions (<https://www.econ-solutions.de/en>)

econ solutions offers solutions for effective operational energy management. The open plug & play software and hardware is flexibly scalable and can work independently or integrate existing hardware and systems from other manufacturers. Services include integration and customizing, system dimensioning and planning, commissioning, software maintenance as well as training and workshops. More than 600 companies rely on the econ software solution, including Aptar, BASF, Bergi Plast, Continental, the HÜBNER Group, ebm-papst, Fried Kunststofftechnik, EDILTEC, TRUMPF Werkzeugmaschinen, Unilever and ZF TRW.

econ solutions GmbH, based in Munich with branches in Berlin, Freiburg, Mühlhausen and Meiningen, was founded in 2010 and has been part of the Mannheim-based MVV Energie AG Group (www.mvv.de) since 2017. Thanks to the close cooperation with 20 companies in the MVV partner network, customers have access to specialists for every energy issue.
